# ASSESSMENT

SCMEP's Rx3 Workforce Assessment is a comprehensive evaluation that appraises the strength and effectiveness of your workforce systems. We bring a set of qualified, "outside eyes" to take a high-level look at your talent management practices, identifying opportunities for improvement and bringing focused, strategic direction.

Building a highly engaged, collaborative, and innovative team will increase your competitive place in the labor market. Successful efforts can generate higher productivity, promote efficiency, boost customer growth, and have a lasting impact on your bottom line.

Developed for manufacturers of any size, the Rx3 Workforce Assessment explores three key workforce areas: Recruitment, Retention and Reputation.

The methodology consists of a brief online questionnaire followed by staff interviews with the final analysis delivered in less than 3 weeks from the start of the journey. Companies cite that the assessment process is holistic, educational, thought provoking, and pragmatic for developing a blueprint to empower positive change.

## REPORT OVERVIEW

### Current State
- Observations from interviews & online survey
- Graphical data from scores

### Desired State
- Information from survey responses
- Discoveries from interviews

### Roadmap
- Suggested roadmap to improve the company's workforce systems
